Introduction

The Saraniyasati Portfolio Website is a personal project developed from scratch using HTML and CSS. It was inspired by a previous version of the website created with Squarespace accessible at saraniyasati.com. This website serves as a portfolio to showcase the skills, projects, and contact information of the owner, Sara Niasati. The current project replicates the look and feel of the original Squarespace website while being developed entirely from scratch using HTML and CSS.

Features

The website includes the following features:

Home Page: The landing page with a navigation bar and sections like "About Me," "Projects," and "Contact."

Navigation: A navigation bar that allows users to switch between different pages and sections easily.

About Me: A section that provides information about Sara Niasati, including an introduction and background.

Projects: A dedicated page showcasing various projects with their names and images

Contact: A page with contact information, including an email address and social media links for getting in touch.

Getting Started

To run this project locally or make modifications, follow these steps:

Open in Visual Studio Code: Open the project folder using Visual Studio Code or your preferred code editor.

Edit HTML/CSS: Modify the HTML and CSS files in the project to make changes to the website's content and design.

Preview Locally: You can open the index.html file in your web browser to preview your changes locally.

Deploy: If you wish to host the website, you can use a web hosting service and upload the HTML and CSS files.

Project Structure

The project directory structure is as follows:

my portfolio project/

- Home.html # Main HTML file for the website's home page
- css/
 - styles.css # CSS stylesheet
- Projects.html # Projects page
- Contact.html # Contact page
- Images and Fies # Directory for storing images and files used in the project
- README.pdf # This README file

Dependencies

The website is built using HTML and CSS, and it does not rely on any external JavaScript libraries or frameworks. However, it's always a good practice to keep your browser up to date for the best viewing experience.

Feel free to reach out to the project owner, Sara Niasati, for any questions or suggestions related to the website. Thank you for your interest in this project!
